___	___	Water Retention

Informed Consent to Care

A patient coming to the doctor gives him/her permission and authority to care for them in accordance with appropriate test, diagnosis, and analysis. The clinical procedures performed are usually beneficial and seldom cause any problem. In rare case, underlying physical defects, deformities or pathologies may render the patient susceptible for injury. The doctor, of course, will not provide specific healthcare, if he/she is aware that such care may be contraindicated. It is the responsibility of the patient to make it known or to learn through health care procedures from whatever he/she is suffering from: latent pathological defects, illnesses, or deformities, which would otherwise not come to the attention of the physician.

I agree to settle any claim or dispute that I may have against or with any of these persons or entities, whether related to the prescribed care or otherwise, will be resolved and final determination will be made with Superior Healthcare Physical Medicine authorized delegates.
